Software alliance program

Access our ecosystem via API and build software for your industry: horticulture, IAQ & HVAC, livestock, retail, and more.

Why use our API

Safe
Securely access Aranet ecosystem's current and past data online

Remote control
Manage sensors and base stations online, anywhere

Scalable
Seamless setup of limitless number of base stations and sensors

Lasting savings
Repeatable remote installation cuts costs

Program benefits

- Access to all Aranet sensor data and base station settings

- Promote your software through our marketing channels and events

- Earn a commission for Aranet sales or get funding if you are a top IoT startup

- Leverage our social media following - we will post about your software

Cloud API is easy

- Pull-type integration for all data

- No 3rd party storage required

- Secure server for full data history & backup

- Cloud-specific access: virtual sensors, alarms, assets
