

Installation process of DOL 53 Ammonia sensor replacement

The sensor element must be replaced within 3 years of operation. The replacement date can be found on the sensor element type plate.

Sensor element replacement process:

1. Check the replacement due date for the sensor.

2. Loosen screws at the bottom of the sensor house.

3. Unscrew plastic cover at the bottom of the sensor house.

4. Pull out the old sensor.

4. Unbox the new sensor and place it in the sensor house.

3. Screw the plastic cover back on.
